

## Digital Mammography can save lives.

Charlotte Radiology is pleased to once again be the first to offer the latest in new technology and services. We are now accepting appointments for digital mammography at our Morehead Medical Plaza Breast Center. Digital mammography is the latest in screening mammography and a more effective breast cancer detection tool for younger women with dense breast tissue. With more locations and comprehensive services than anyone else in the region, it's no wonder more than 75,000 women turn to us each year for their breast health needs. Log on to [charlotteradiology.com](http://charlotteradiology.com) to find out if you could be a candidate for digital mammography.
